

ADVANTAGE Care Link

Independent Living Solutions

Testimonials...

It's easy to use. Even notifications are logical and can be figured out on your own. I can really understand what her day is like based on activities logged in the history tab. Government really should pay for this because it is keeping her at home. I would have brought her to the hospital by now if she did not have this system in her house. It allows me to know how "bad" things really are, or are not. If I did not have it I would be guessing and the stress would have caused me to bring her to the hospital by now.

Wendy H (Alberta)

My sisters out west are thrilled. My sister in Edmonton thinks this is the best thing in the world.

Lyndon S (New Brunswick)

I love the cameras and the notifications. It is helping all of us a lot. My sister out of town loves it. Mom really likes the Medication Compliance. When she used to forget to take her medications she would take a double dose to catch up. Now when she forgets it, the system calls her right away and she no longer truly forgets it and does not have to take double doses.

Christina V (New Brunswick)

It gives me peace of mind. My dad does not need monitoring all the time. But if he fell he would not tell you. If he falls at night, he cannot get up by himself so CareLink Advantage would prevent him from lying there all night. I can check in on him. Everyone is amazed... We didn't know anything like this existed.

Ken A (New Brunswick)

The system has been a life saver and I truly am unable to live without it.

T. O'Brien (Ontario)

This has enabled her to stay in her home longer, and stalling the admission to a retirement home, AND WE DECLINED a LTCF BED! CareLink Advantage is costing us about \$1,200.00 less per month than the alternative we were considering. It absolutely has reduced our stress. Medication management and monitoring the doors are huge to us!!! I feel it is a wonderful alternative for seniors who wish to stay at home longer and delay the cost of alternate living whether it is a retirement home setting or LTCF or even implementing home cares services. I love the CareLink Advantage system, and it has been worth every penny!

Lena A (Ontario)

Family members from some of our pilot participants in New Brunswick have told us they have decided not to apply for a nursing home bed for their parent because of what the CareLink Advantage system is doing for them as a caregiver.

Barb Burnett, Executive Director,
The Atlantic Institute On Aging.

I am so happy with CareLink. You have made things so easy and simple and so non-invasive for my mom and us as a family. There is nothing that I would change about it and there is nothing I don't like about it. I really don't know how I could get along without it now. Mom seems relieved that I am "peeking at her" as she calls it...lol...and it's such a relief to be able to check on her whenever I want. Before I had CareLink, I was making trips up to mom's frequently to check on her when she didn't answer the phone, especially at night! Now I just go on line and check and she is usually turned away from the phone and didn't hear it. I always worried about someone getting in the house at night, even though the door was locked. Now the alarm rings if anyone goes in after a certain time at night. Such peace of mind! I really don't think mom could still be at home without CareLink...it has become a very important part of her care. I hope more people will be able to have access to it.

Sharon M (New Brunswick)

If it were not for this amazing system Dad would not have been able to stay on PEI...which is all he wanted! You and your staff should all know what an incredible difference you made in the lives of my parents. My entire family thanks you.

Cindy G (PEI)
